
Format CALL MOD(number,divisor,quotient,remainder
 [,...])

Description

The MOD command will make a MODULO FACTOR of a number and divisor to produce a quotient and remainder. MOD command will only factor numbers from -32678 to 32767 larger values will be clipped by the internal integer format. Also if the number is 0 or divisor is 0 a error of bad value will result as you can not divide 0 by anything or anything by 0.

Programs

Number=10 and Divisor=3		>100 N=10 :: D=3
Do MOD on values with results		>110 CALL MOD(N,D,Q,R)
Print Q and R values on screen		>120 PRINT Q,R
N=number,D=divisor,Q=Quotient		
and R=remainder		
Divide 32767/3		>100 CALL MOD(32767,3,Q,R)
Show results		>110 PRINT Q,R
Q=10922 and R=1		
Divide -32768/3		>100 CALL MOD(-32768,3,Q,R)
Show results		>110 PRINT Q,R
Q=10922 and R=2
