

---

Format           CALL PATTERN(#sprite-number,character-value  
                  [,...])

#### Description

See EXTENDED BASIC MANUAL page 142 for more data.  
Now 30 (CURSOR) and 31 (EDGE CHARACTER) and 144 to 159 may  
used if only the top highest sprite numbers are used. For  
example you can not use sprite #1 if you are using characters  
143 to 146 to define a sprite pattern, but you could use  
sprite #28 instead with no issues. Thus some care must be  
taken to use all characters from 144 to 159 when using sprites.  
But the advantage is now you can use 30 to 159 in RXB.  
PATTERN runs from ROM.

CALL PATTERN just allows Sprite patterns not characters.

#### Options

Sprites may not be used if characters 144 to 159 are being  
redefined for use.
