
Format

CALL SCROLLUP

CALL SCROLLUP(repetition)

CALL SCROLLUP(repetition,string)

CALL SCROLLUP(repetition,string,tab)

Description

SCROLLUP scrolls screen up so repetition will repeat the scroll number of times to up, the string will only display horizontally 32 characters of the string. SCROLLUP puts the string on screen and wraps to top if string is too long. If the string is empty (null) it will just scroll the screen each line till end of string. Numbers or variables can be used instead of a string. SCROLLUP runs from ROM.

Programs
