

### S SET PATH NAMES

Sets path of Editor, Assembler, source, object, and list files. Selection of 1 to 6 allows a input like as in previous Editor Assembler version including REA. Selection of CTRL 1 to 5 will allow single selection of drive number for that path. As an example is select CTRL 1 and the number 1 in path DSK1.EDIT1 will beep and ask for a drive number or letter. Another beep indicates selection made and shows the change.

### E EDITOR

Has a arrow to indicate which option has been selected, thus the user will no longer make a mistake of saving a blank file over the original that he actually meant to load or save. Also as Edit path is preset the loading is automatic for the Editor and the file to load. Save file still asks for a path name and file. Print also asks for device or path name.

i.e. DSK.VOLUMENAME.EDIT1 or WDS1.DIRECTORY.SUBDIRECTORY.EDIT1

The directory will load the selected file if this option is used. See Directory for features.

### A ASSEMBLER

Assembler has no menu selection as CONFIGURE PATHS does this. The ASSM1 path from S SET PATH automatically loads Source, Object, List file paths and Options. A Assembler key press from main menu starts the Assembler, but SET PATH must be first.

i.e. DSK.VOLUMENAME.ASSM1 or WDS1.DIRECTORY.SUBDIRECTORY.ASSM1

The directory will replace the selected file if this option is used. See Directory for features.

### L LOAD and RUN

The directory will load the selected file if this option is used. After loading a file all the link names will be

displayed

including all support routines. Using arrow keys the selected link name can be executed by pressing ENTER key. Up to 80 link names will be displayed on screen thus arrow keys to select a program name to run. See Directory for features.

### P PROGRAM FILE

By pressing a single key then enter, DSK#.UTIL1 is displayed and executed. # indicates the key pressed A to Z or 1 to 9. Pressing 0 (zero) runs WDS1.UTIL1 at PROGRAM FILE. The

directory

will load the selected file if this option is used. The lower

8K

support routines normally only loaded by the EA3 option are

now

and

loaded by this option too. So users can load FORTH, FORTRAM,  
C programs from the EA5 prompt.

#### X XB PROGRAM

is

New feature that prompts for a XB program file to run. If the  
file or device errors out, then a return to RXB command mode

is

done. The \* R X B \* and a flashing cursor indicates the XB  
command mode. By pressing a single key then enter, DSK#.LOAD  
displayed and executed. # indicates the key pressed. The  
directory will load the selected file if this option is used.  
See Directory for new features.
